PAPER 3 (Calculator)		
Foundation Tier		
You must have: Ruler graduated in ce protractor, pair of compasses, pen, HB Formulae Sheet (enclosed). Tracing pa	pencil, eras	ser, calculator,

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer all questions.
- Answer the questions in the spaces provided
 - there may be more space than you need.
- You must show all your working.
- Diagrams are **NOT** accurately drawn, unless otherwise indicated.
- Calculators may be used.
- If your calculator does not have a π button, take the value of π to be 3.142 unless the question instructs otherwise.

Information

- The total mark for this paper is 80
- The marks for **each** question are shown in brackets
 - use this as a guide as to how much time to spend on each question.

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.

Turn over ▶

Answer ALL questions.

Write your answers in the spaces provided.

You must write down all the stages in your working.

1 Write 35% as a decimal.

(Total for Question 1 is 1 mark)

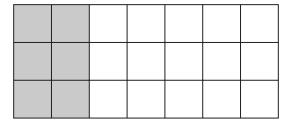

2 Write 8061 correct to the nearest hundred.

(Total for Question 2 is 1 mark)

3 Write down a number that is less than -5

(Total for Question 3 is 1 mark)

4 Here is a grid of squares.

What fraction of the grid is shaded?

(Total for Question 4 is 1 mark)

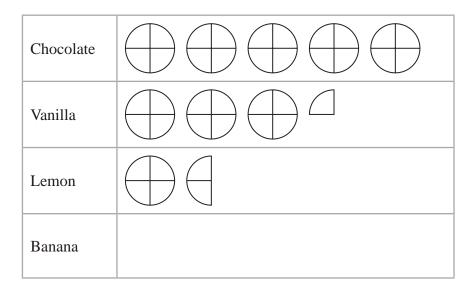

5 Write down the value of the 9 in the number 27.963

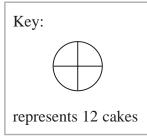

(Total for Question 5 is 1 mark)

2

6 The pictogram shows information about the number of chocolate cakes, vanilla cakes and lemon cakes sold by Year 7 at a school fair.

24 banana cakes were sold by Year 7

(a) Use this information to complete the pictogram.

(1)

At the fair, Year 8 sold a total of 150 cakes.

(b) Which Year sold most cakes at the fair, Year 7 or Year 8? You must show how you get your answer.

(3)

(Total for Question 6 is 4 marks)

7	Miklos is swimming lengths Each length of the pool is 25		nming poo	l.		
	Miklos has swum 178 length He wants to swim a total dist					
	Calculate how many more le	ngths Mi	klos needs	to swim.		
				(To	otal for Question	7 is 3 marks)
	Here are the first four terms	of a numl	ber sequen	ce.		
	97		91	85	79	
	(a) Explain how to work out	the next	number of	the sequence	е.	
						(1)
	(b) Work out the difference b	oetween t	he 5th term	and the 7th	term of the seque	ence.
	(a) Evplain why 52 is not a	number i	n this seam	anca		(2)
	(c) Explain why 52 is not a	number n	ii uns seque	ence.		
						(1)
				(To	otal for Question	8 is 4 marks)

9 Mandy buys a 12 kilogram bag of dog food.

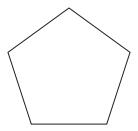

Mandy's dog has 3 meals a day. She gives her dog 105 grams of dog food for each of these meals.

How many complete weeks will the bag of dog food last? You must show all your working.

(Total for Question 9 is 5 marks)

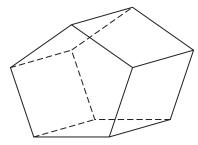

10 Here is a polygon.

(a) Write down the mathematical name of this polygon.

(1)

Here is a prism.

Each edge of the prism has a length of 7.5 cm.

(b) Work out the total length of the edges of the prism.

.....cn

(2)

(Total for Question 10 is 3 marks)

11 There are only red counters, blue counters and green counters in a bag.

number of red counters: number of blue counters: number of green counters = 2:16:7

What fraction of the counters in the bag are green counters?

(Total for Question 11 is 2 marks)

12 A chess match lasted $3\frac{1}{4}$ hours.

The match finished at 1410

At what time did the chess match start?

(Total for Question 12 is 2 marks)

13 (a) Simplify $8h^3 + 14h^3 - 2h^3$

(1)

(b) Simplify $(9y + 12y) \div 3$

(1)

(Total for Question 13 is 2 marks)

14 Write the following numbers in order of size. Start with the smallest number.

 $\frac{7}{12}$

0.56

57%

 $\frac{6}{11}$

0.558

(Total for Question 14 is 2 marks)

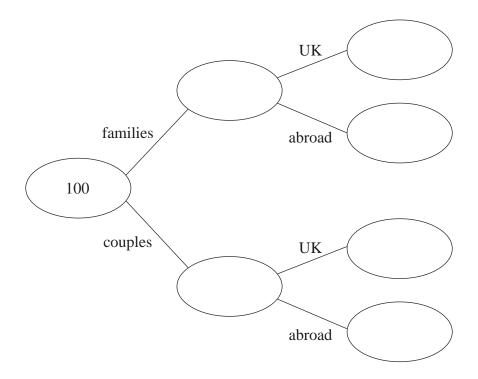

15 A travel agent sold 100 holidays in April. Each of these holidays was in the UK or was abroad.

64 of the 100 holidays were sold to families. The rest of the holidays were sold to couples.

11 of the 18 holidays abroad were sold to couples.

(a) Use this information to complete the frequency tree.

(3)

One of the holidays sold to a family is chosen at random.

(b) Find the probability that this holiday was **not** abroad.

(2)

(Total for Question 15 is 5 marks)

8

16 Solve $\frac{x}{7} + 9 = 4$

x =	:	 	

(Total for Question 16 is 2 marks)

17 Blake works 32 hours a week in the UK. She is paid £473.28 per week.

Blake applies for a job in Australia. The rate of pay is 26.40 Australian dollars per hour.

£1 = 1.796 Australian dollars

Blake thinks the rate of pay in Australia is greater than the rate of pay in the UK.

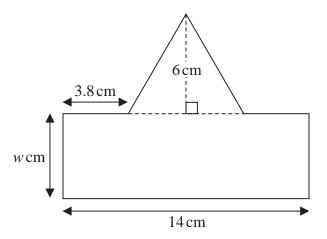

Is Blake correct?

You must show how you get your answer.

(Total for Question 17 is 3 marks)

18 Here is a shape made from a rectangle and a triangle.

The shape has exactly one line of symmetry.

The area of the rectangle is 3.5 times the area of the triangle.

The width of the rectangle is $w \, \text{cm}$.

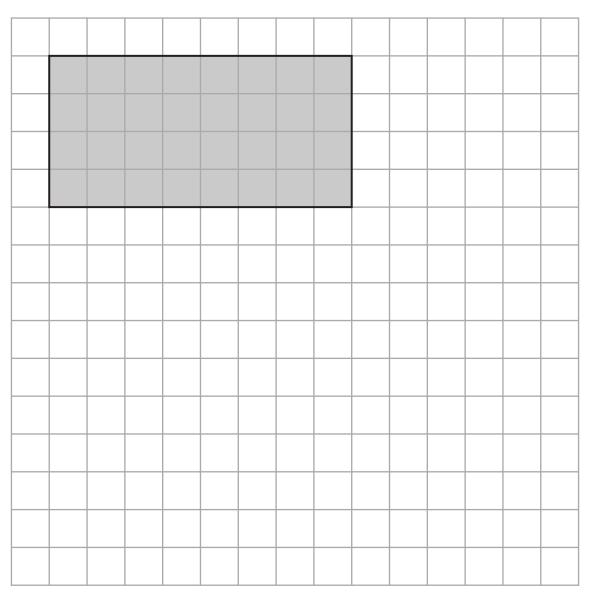

Work out the value of w.

You must show all your working.

w =

(Total for Question 18 is 5 marks)

19 The front elevation of a cuboid is shown on the centimetre grid below.

The volume of the cuboid is 224 cm³

On the grid, draw the plan of the cuboid.

(Total for Question 19 is 3 marks)

20 (a) Write 468 000 in standard form.

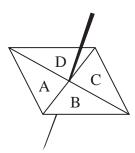

(1)

(b) Write 5.037×10^{-4} as an ordinary number.

(1)

(Total for Question 20 is 2 marks)

21 Here is a biased spinner.

The table shows the probabilities that when the spinner is spun it will land on A, on B, on C and on D.

Letter	A	В	С	D
Probability	0.4	0.21	0.32	0.07

Luka will spin the spinner 200 times.

Work out an estimate for the number of times the spinner will land on A.

(Total for Question 21 is 2 marks)

22 Seija works at a weather station.

The table gives information about the temperature, T °C, at midday for each of 50 cities in the UK on Tuesday.

Temperature $(T {}^{\circ}\mathbf{C})$	Frequency
$10 < T \leqslant 15$	2
$15 < T \leqslant 20$	8
$20 < T \leqslant 25$	13
$25 < T \leqslant 30$	21
$30 < T \leqslant 35$	6

(a) Calculate an estimate for the mean temperature.

°C

Seija says,

"The median temperature is 22.5 °C because 22.5 is the middle number in the middle group."

(b) Is Seija correct?

Give a reason for your answer.

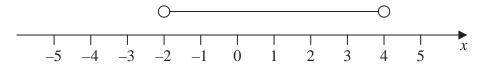

(1)

(Total for Question 22 is 4 marks)

23 Jenna is asked to show the inequality $-3 < x \le 4$ on a number line.

Here is her answer.

(a) Write down two mistakes Jenna has made.

1.....

2.....

(2)

(b) Work out the greatest integer that satisfies the inequality

$$5y - 7 < 16$$

(2)

(Total for Question 23 is 4 marks)

24 Ali buys packs of balloons and boxes of pencils.

There are 30 balloons in each pack.

There are 24 pencils in each box.

Ali buys exactly the same number of balloons and pencils.

Work out how many packs of balloons and how many boxes of pencils she could have bought.

You must show all your working.

packs of balloon	IS
boxes of pencil	ls

(Total for Question 24 is 3 marks)

25 A company orders a large number of plates from a factory.

It would take 30 hours to make all the plates using 4 machines.

How many machines are needed to make all the plates in 6 hours?

(Total for Question 25 is 2 marks)

26 Riley travelled by car and by aeroplane.

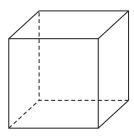

He travelled 143 miles by car at an average speed of 55 miles per hour. Riley then travelled for 5 hours and 20 minutes by aeroplane.

Work out, in hours and minutes, Riley's total travelling time.

hours minutes

(Total for Question 26 is 3 marks)

27 The diagram shows a solid cube placed on a horizontal table.

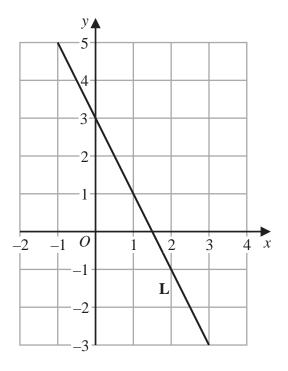

$$pressure = \frac{force}{area}$$

The pressure on the table due to the cube is 3.5 newtons/cm². The force exerted by the cube on the table is 504 newtons.

Show that the total surface area of the cube is less than 900 cm²

(Total for Question 27 is 3 marks)

 $28\,$ The line L is shown on the grid.

Find an equation for L.

(Total for Question 28 is 3 marks)

29 A, B, C and D are points on a circle such that ABCD is a square.

The square ABCD has sides of length 3.5 cm.

Calculate the circumference of the circle. Give your answer correct to 1 decimal place. You must show all your working.

(Total for Question 29 is 4 marks)

TOTAL FOR PAPER IS 80 MARKS

Foundation Tier Formulae Sheet

Perimeter, area and volume

Where a and b are the lengths of the parallel sides and h is their perpendicular separation:

Area of a trapezium =
$$\frac{1}{2} (a + b) h$$

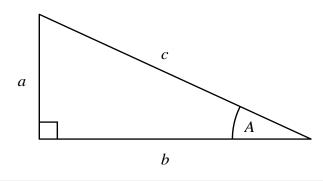

Volume of a prism = area of cross section \times length

Where r is the radius and d is the diameter:

Circumference of a circle = $2\pi r = \pi d$

Area of a circle = πr^2

Pythagoras' Theorem and Trigonometry

In any right-angled triangle where a, b and c are the length of the sides and c is the hypotenuse:

$$a^2 + b^2 = c^2$$

In any right-angled triangle ABC where a, b and c are the length of the sides and c is the hypotenuse:

$$\sin A = \frac{a}{c} \quad \cos A = \frac{b}{c} \quad \tan A = \frac{a}{b}$$

Compound Interest

Where P is the principal amount, r is the interest rate over a given period and n is number of times that the interest is compounded:

Total accrued =
$$P \left(1 + \frac{r}{100} \right)^n$$

Probability

Where P(A) is the probability of outcome A and P(B) is the probability of outcome B:

$$P(A \text{ or } B) = P(A) + P(B) - P(A \text{ and } B)$$
