Introduction & Executive Summary

This report has been prepared for the following requested parameters:

- 1. Supplying Country: Germany
- 2. Buying Country: USA
- The period that is covered by the analysis in the report: January 2017 - December 2024

Data Source

The analysis presented in this report is based on trade statistics provided by the most recent and reliable data published by the relevant authorities of the respective countries. These figures are considered to offer the highest degree of accuracy and credibility in the context of the analysis.

Report Objective

The primary objective of this report is to identify goods with the highest trade potential between the two selected countries, with a focus on both current trade value and the respective long-term and short-term trade trends.

Methodology

The findings and conclusions of this report are derived from an in-depth analysis of the 300 highest-value goods, categorized by 6-digit Harmonized System (HS) codes that are exchanged between the two countries in the selected trade direction. The analysis examines the 300 most actively traded goods between the two countries, categorizing them into four groups:

- 1. Largest-value traded goods; this category encompasses the top 25 goods by trade value in 2024;
- 2. Champion-value traded goods; this category includes goods ranked 26 to 100 by trade value in 2024;
- 3. Rising Champion value traded goods; this category includes goods ranked 101 to 200 by the trade value in 2024;
- 4. Latent Champion value traded goods; this category includes goods ranked 201 to 300 by the trade value in 2024.

Both long-term and short-term trade dynamics are evaluated for each segment, with growth measured exclusively in U.S. dollar terms. This analysis includes the compound annual growth rate (CAGR) over the longest available period for which complete calendar-year data is available, as well as the growth rate for the most recent reporting period.

At the conclusion of each segment’s analysis, the goods are ranked using three equally weighted indicators on a 10-point scale:

- 1. Import Value in 2024 (absolute size in USD)
- 2. Long-term growth trend (CAGR)
- 3. Short-term growth rate (most recent period)
- 4. Product’s share in Buying Country’s market

The score for each indicator is assigned from 1 to 10 depending on the respective values of each indicator. The total score for each good is calculated as the sum of these three indicators. Products with the highest scores are identified as the most promising for supply opportunities, while those with the lowest scores are considered to pose the greatest risk.

Summary: Total Country-to-Country Supplies

This section of the Summary provides an overview of the total trade value between the two selected countries, based on the chosen trade direction for analysis. The chart on the left visualizes the total annual imports between the countries, measured in U.S. dollars. On the right, the year-over-year (YoY) growth rates of imports are displayed.

Summary: Top-25 Largest Goods Traded Between the Two Countries

This section of the Summary highlights the top 25 largest traded goods, classified under 4-digit HS codes, between the two countries based on the selected trade direction. The goods are listed in descending order by import value in 2024, from the highest to the lowest. To provide insight into trade performance, the short-term trade dynamics are represented by the import growth rate in 2024 compared to 2023, while long-term dynamics are measured using the compound annual growth rate (CAGR) for the period 2017–2023. These indicators help assess how trade in these high-value goods has evolved over time. Additionally, this section provides a treemap on share in total imports in 2024.

Summary: Top-5 Largest Goods Traded Between the Two Countries

This section of the Summary offers a detailed breakdown of the top five largest goods traded between the two countries. The tables below illustrate how the total import value is distributed among more specific products within each 4-digit HS code group. This breakdown provides a clearer view of the key products driving trade, along with their long-term dynamics – measured by the compound annual growth rate (CAGR) for the period 2017-2023 – and short-term performance, reflected in the import growth rate for 2024 compared to 2023.

Largest Value Traded Goods: Products with the Highest Long-Term and Short-Term Positive and Negative Changes in Import Value

This section of the report presents a comprehensive analysis of the goods classified under the “Largest-Value Traded Goods” group. This page focuses on the top six products identified as experiencing the highest growth or decline in both the short and long term. The short-term ranking is based on year-over-year (YoY) import growth rates for 2024 compared to 2023, while the long-term ranking is determined by the compound annual growth rate (CAGR) for the period 2017–2023. The tables on the top-left and bottom-left highlight the products with the highest growth in the short and long terms, respectively, whereas the tables on the top-right and bottom-right display those with the largest declines. Each table includes import values for these products in 2024, along with their corresponding growth rates.

Champion-Value Traded Goods: Evolution of Trade Partner’s Impact in the Market of Buying Country

This section of the report highlights the goods originating from the supplying country that hold the largest shares in the buying country’s total imports of these goods in the “Champion-Value Traded Goods” group. Presented here is a comprehensive table detailing the share of each identified good within the buying country’s total imports from 2017 through 2024 (goods ranked 1-15 by their share in 2024).

Champion-Value Traded Goods: Products with the Highest Long-Term and Short-Term Positive Changes in Import Value

This section of the report presents a comprehensive analysis of the goods classified under the “Champion-Value Traded Goods” group. This page focuses on the top fifteen products identified as experiencing the highest growth in the short and long term. The short-term ranking is based on year-over-year (YoY) import growth rates for 2024 compared to 2023, while the long-term ranking is determined by the compound annual growth rate (CAGR) for the period 2017–2023. The table on the left highlights the products with the highest growth in the short term, whereas the table on right displays those with the largest growth in the long term. Each table includes import values for these products in 2024, along with their corresponding growth rates.

Rising Champion Value Traded Goods: Products with the Highest Long-Term and Short-Term Positive Changes in Import Value

This section of the report presents a comprehensive analysis of the goods classified under the “Rising Champion Value Traded Goods” group. This page focuses on the top fifteen products identified as experiencing the highest growth in the short and long term. The short-term ranking is based on year-over-year (YoY) import growth rates for 2024 compared to 2023, while the long-term ranking is determined by the compound annual growth rate (CAGR) for the period 2017–2023. The table on the left highlights the products with the highest growth in the short term, whereas the table on right displays those with the largest growth in the long term. Each table includes import values for these products in 2024, along with their corresponding growth rates.

Latent Champion Value Traded Goods: Import Values by Product (2017-2024) (2)

This section of the report provides an in-depth analysis of the goods classified under the “Latent Champion Value Traded Goods” group. This page continues presenting detailed import value data for each good in the group from 2017 to 2024, alongside year-over-year (YoY) growth rates for 2024, the compound annual growth rate (CAGR) for the period 2017–2023, and the share of each good in total imports between the countries in 2024.

Latent Champion Value Traded Goods: Products with the Highest Long-Term and Short-Term Positive Changes in Import Value

This section of the report presents a comprehensive analysis of the goods classified under the “Latent Champion Value Traded Goods” group. This page focuses on the top fifteen products identified as experiencing the highest growth in the short and long term. The short-term ranking is based on year-over-year (YoY) import growth rates for 2024 compared to 2023, while the long-term ranking is determined by the compound annual growth rate (CAGR) for the period 2017–2023. The table on the left highlights the products with the highest growth in the short term, whereas the table on right displays those with the largest growth in the long term. Each table includes import values for these products in 2024, along with their corresponding growth rates.

Products with the Highest Long-Term and Short-Term Positive Changes in Import Value

This section of the report highlights the goods originating from the supplying country that hold the largest shares in the buying country’s total imports of these goods. This page focuses on the top fifteen products identified as experiencing the highest growth in the short and long term. The short-term ranking is based on year-over-year (YoY) market share growth rates for 2024 compared to 2023, while the long-term ranking is determined by the compound annual growth rate (CAGR) for the period 2017–2024. The table on the left highlights the products with the highest growth in the short term, whereas the table on right displays those with the largest growth in the long term. Each table includes market share values for these products in 2024, along with their corresponding growth rates.

Products with the Highest Long-Term and Short-Term Negative Changes in Import Value

This section of the report highlights the goods originating from the supplying country that hold the largest shares in the buying country’s total imports of these goods. This page focuses on the top fifteen products identified as experiencing the highest decline in the short and long term. The short-term ranking is based on year-over-year (YoY) market share growth rates for 2024 compared to 2023, while the long-term ranking is determined by the compound annual growth rate (CAGR) for the period 2017–2024. The table on the left highlights the products with the highest decline in the short term, whereas the table on right displays those with the largest decline in the long term. Each table includes market share values for these products in 2024, along with their coresponding growth rates.
