

Eyelation is a benefit management system that eliminates the administrative challenges of managing prescription safety eyewear programs. Our system gives every employee, on every shift, at every location the ability to order their company approved prescription safety glasses when it's convenient for them.

Why companies are switching to the Eyelation Benefit Management System

- Low touch telehealth approach
- Employees have 24/7 access
- Customization available for departments so employees only have access to approved frames, lenses, and options
- Orders are reviewed by professional opticians
- Fast, free shipping
- Benefits and eligibility are managed by Eyelation
- Administrators can access our administrative portal to monitor the program in real time
- Summary invoicing simplifies billing saving administrators time and money
- 30-day satisfaction guarantee

Employees prefer the Eyelation program because they can choose from a variety of approved frames and lens options when it is convenient for them and receive their order in days.

Eyelation's user-friendly technology guides employees through the simple, three-step ordering process while tracking eligibility, benefit allowance and approved items for each employee.
