

Unit comes patient ready and includes:

FEATURES:

- 15" Touchscreen LCD with Trim Knob navigation and corded remote control (optional)
- Up to 8 waveforms with 14 waveforms with overlays
- Scaleable monitoring capabilities
- 2 e-module slots and Patient Data Module integration for NIBP, Spo2, ECG and temp measurement
- 2 hour battery operating time with battery integration
- Wireless communication with CARESCAPE central station
- User friendly interface for ease of use in any clinical environment

The Carescape B650 patient monitor is a high mobility monitor that can integrate with existing Carescape central stations while functioning independently via Patient Data Module for measurement parameters via wireless network integration. Offering the same user-friendly interface across the CARESCAPE monitors, the CARESCAPE B650 monitor also incorporates a touchscreen and trim knob for seamless operation.

- A/C Power Cord
- PDM (option)
