

Unit comes patient ready and includes:

FEATURES:

- Shock advisory system guides user with voice and visual prompts through each step.
- easy manual mode, including waveform displays.
- Noninvasive pacing, Masimo SET pulse oximetry, ECG wirigin (3- or 5-wire) and synchronized cardioversion.
- Designed for indoor use, compact and lightweight makes it easy to rush to the scene
- Optional docking station enables device to be firmly attached to crash cart for safe transport
- Superb color graphics, easily viewed from many angles, enable clinicians to clearly see color matched waveforms and values for efficient and informed patient care decisions.

The Physio-Control Lifepak 20 is a handheld Defibrillator / monitor, making it easy to move to the patient. The Lifepak 20 offers both manual and AED modes. The manual mode can provide up to 360J of energy while offering synchronous cardioversion and pacing as well. The Lifepak Defibrillator system comes with capabilities for both ALS and BLS users. When the system is in the AED mode, the Lifepak 20 offers semi-automatic defibrillation that uses the Shock advisory System. This can analyze and detect a shockable rhythm. The defibrillator's color display can show waveforms for 3-lead ECG, alphanumeric values, and device instruction or prompts.

- A/C Power cord
- SpO2 Sensor w/ adapter
- Patient cable w/ leads

- Battery
- Handsfree cable
