

FEATURES:

- 6.5" color display with large numerics and graphics
- Intuitive touchscreen for ease of use
- Transducer plug and play with automatic screen layout to focus on the patient, not the system
- Data buffer with multi-patient handling for random printout
- Cross-channel verification of maternal and fetal heart rates
- Up to 4-hour battery operating time

Avalon FM30 covers patients from the onset of contractions through final stages of delivery with its full set of external and internal fetal parameters, such as ultrasound and direct fetal heart rate, Toco, and intrauterine pressure. This fetal/maternal monitor provides monitoring of maternal blood pressure, heart rate and the maternal ECG wave. The FM30 includes all the new high-performance functionality of the FM20, plus maternal pulse oximetry.

Unit comes patient ready and includes:

- A/C Power cord
- NIBP cuff w/ hose
- SpO2 Sensor w/ adapter
- Printer Paper
- TOCO transducer
- ULTRASOUND transducer
- A/C Adapter
