- 12.1" color touchscreen display with up to 8 waveforms.
- 3, 5,6, or 12 lead ECG.
- Ability to integrate with Panorama Central Stations and Nurse Call Systems.
- IV drug calculations and hemodynamic calculations.
- Modern User-interface.
- Interchangeable system elements.
- Consistent performance and easy maintenance

The Mindray V12 monitoring platform is a modular patient monitoring system. The system architecture allows users to customize, by removal or addition of modules, monitored parameters based on patients monitoring need or acuity level. The V Series monitoring platform maximizes the amount of viewable data through portrait display orientation.

- A/C Power cord
- Battery
- NIBP cuff w/ hose
- SpO2 Sensor w/ adapter
- 3 or 5 Lead patient cable w/ leads
