

Unit comes patient ready and includes:

FEATURES:

- Biphasic defibrillation waveform
- Semi-automatic defibrillation
- Noninvasive pacemaker
- Pulse oximeter
- Interpretive 12-lead ECG
- Noninvasive blood pressure (NIBP) monitor
- End-tidal CO2 (EtCO2) monitor
- Invasive pressure (IP) monitor
- Vital sign (VS) and ST monitoring
- Fax transmission
- Lifepak 12 Paddle accessories
- Electroluminescent (EL) display
- Wide range of battery options

The LIFEPAK® 12 Defibrillator* is a multi-parameter device that combines semi-automated and manual defibrillation with capnography, ECG monitoring, 12 lead ECG capture, pacing and synchronized cardioversion. With an upgradeable platform, users can add new parameters as new features are introduced and when customers' needs change. This compact defibrillator is designed for pre-hospital, critical care transport and clinical applications. The Physio-Control LIFEPAK 12 is tough enough for mobile and transport use, but excels in clinical settings, too. You can use it anywhere.

- A/C Power cord
- NIBP cuff w/ hose
- SpO2 Sensor w/ adapter
- Patient cable w/ leads

- Two Batteries
- Handsfree cable
- A/C Charger/adapter (option)
