### Internal RWR

- Precipitation (mm/year): [1] 2,497
- Area of the country (1000 ha): [2] 71.9
- Precipitation (km³/year): [3] 1.795

### Surface water: produced internally

- Inflow not submitted to treaties
- Inflow secured through treaties
- Flow in border rivers
- Accounted inflow

### Groundwater: produced internally

- Inflow submitted to treaties
- Inflow secured through treaties

### Overlap between surface water and groundwater

### Total internal renewable water resources

### External RWR

| Surface water entering the country | [8] 0 | [9] 0 |
| Surface water leaving the country | [11] 0 | [12] 0 |

| Groundwater entering the country | [14] 0 |
| Groundwater leaving the country | 0 |

### Total external renewable water resources

|                  | [15] 0 | [16] 0 |
|                  |       |       |

### Total RWR

| Surface water | [16] 0 |
| Groundwater | [17] 0 |
| Overlap between surface water and groundwater | [18] 0.6 |

### Total renewable water resources

|                  | [19] 0 |
|                  |       |

### Dependency ratio (%)

\[
\text{Dependency ratio} = \frac{[11] + [14]}{[11] + [14] + [7]} \times 100
\]

### Computation of long-term annual renewable water resources (RWR) by country (in km³/year, average)

Singapore

- Precipitation (mm/year): 2,497
- Area of the country (1000 ha): 71.9
- Precipitation (km³/year): 1.795
- Surface water: produced internally
- Groundwater: produced internally
- Overlap between surface water and groundwater
- Total internal renewable water resources: 0.6
