Metadatos:

- (a) Surface water produced internally: Caspian Sea basin: 14.4; Black Sea basin: 42.5.
 (b) Overlap between surface water and groundwater (GW) is less than 100% of GW recharge; most of the GW is drained by the rivers (equivalent to the low flow of water courses). Some groundwater escapes and flows out into the sea.
 (c) Inflow not submitted to treaty: Mktvari 0.91; Potskhovi 0.25; Debet 0.89
 (d) Half of the flow. Agreement with Turkey in 1925 to have each half of the flow of the Corub river, which originates in Georgia
 (e) From Turkey 4.31 (0.91 through Mktvari, 0.25 through Potskhovi, and 3.15 through Corub/Choroki as agreed with Turkey); from Armenia 0.89 (Debet)
 (f) Outflow all to Azerbaijan (11.91): Kura 8.23; Iori 0.58; Alazani 3.1
