

Table 1

Parameters used to estimate area irrigated with groundwater per municipal unit in Brazil.

Aquifer productivity class	Mean capacity of wells (m³/h)	Weights assigned to compute irrigated area from groundwater (-)	Irrigated area assigned to each registered tube well (ha)
Very high	30	1	30
High	15	1	15
Medium	10	0	10
Low	5	0	5
Very low	2	0	2
