

TABLE 1

Priorities used to assign irrigated area to cultivated areas on coarse textured soil in Denmark.

Attribute in Corine land cover 2000 data base	Attributes in soil map *	Priority
Non-irrigated arable land (211) or fruit trees and berry plantations (222) or complex cultivation patterns (242)	SLTXCL = 1 and SLTXCL2 = 1	5
Non-irrigated arable land (211) or fruit trees and berry plantations (222) or complex cultivation patterns (242)	SLTXCL = 1 and SLTXCL2 > 1 or SLTXCL > 1 and SLTXCL2 = 1	4

*: SLTXCL represents the soil texture class of the main soil type, while SLTXCL2 is the soil texture class of an associated soil; a soil texture class of 1 is assigned to soils having less than 18% clay content and more than 65% sand content.
