

RISK DISCLOSURE STATEMENT

Funded Futures Network LLC

Last Updated: [Month Day, Year — set upon publication]

This Risk Disclosure Statement (“Statement”) describes important risks associated with the services offered by Funded Futures Network LLC (“FFN,” “we,” “us,” or “our”) through fundedfuturesnetwork.com and related platforms, dashboards, and programs (collectively, the “Services”). Please read this Statement carefully before purchasing an evaluation, participating in any FFN program, or using the Services. This Statement should be read together with FFN’s Terms of Use and published Trading Rules, which contain additional disclaimers, limitations of liability, and dispute resolution terms. Neither this Statement nor those related documents can fully describe every potential risk. By registering for, purchasing, or using the Services, you acknowledge that you have read, understood, and accepted the disclosures below and that you accept the risks of participation, whether or not specifically described here.

1. Regulatory Status

FFN is not a broker-dealer, futures commission merchant (FCM), introducing broker, commodity trading advisor, commodity pool operator, retail foreign exchange dealer, investment adviser, or any similar financial institution. FFN is not registered with, licensed by, or regulated by the U.S. Commodity Futures Trading Commission (CFTC), the National Futures Association (NFA), the U.S. Securities and Exchange Commission (SEC), FINRA, or any other financial regulatory authority, and no such authority has reviewed or approved the Services.

FFN does not accept customer deposits, does not solicit funds for investment, does not deal in securities, does not execute customer orders in live markets, does not offer investment opportunities, and does not provide investment, financial, legal, or tax advice. FFN does not trade against its users, front-run user orders, or copy user orders or executions in any fashion.

2. Nature of the Services — Simulated Trading Environment

FFN provides a skill-evaluation service for aspiring futures traders. Evaluation accounts, exhibition accounts, and sim-funded accounts operate entirely in a simulated trading environment using simulated funds, simulated fill prices, and simulated fees and commissions. You do not deposit trading capital with FFN, no real futures positions are established on your behalf in any simulated stage, and simulated account balances are notional figures that have no monetary value and cannot be withdrawn except as expressly provided in FFN’s published payout rules.

Any payment FFN makes to a trader under its published payout rules is compensation earned under the terms of the applicable program. It is not a return on an investment, a distribution of trading profits from a customer account, or a withdrawal of deposited funds.

Market data used in the Services is supplied by third-party providers. FFN and its providers do not represent that such data is complete, accurate, or error-free at all times, and pricing or fills in the

simulated environment may differ from prices obtainable in live markets. Knowingly exploiting unrealistic simulated fill prices or order-queue behavior is prohibited and is grounds for account termination under FFN's Terms of Use and published Trading Rules.

3. Hypothetical and Simulated Performance Disclaimer

HYPOTHETICAL OR SIMULATED PERFORMANCE RESULTS HAVE CERTAIN INHERENT LIMITATIONS. UNLIKE AN ACTUAL PERFORMANCE RECORD, SIMULATED RESULTS DO NOT REPRESENT ACTUAL TRADING. BECAUSE THE TRADES HAVE NOT ACTUALLY BEEN EXECUTED, THE RESULTS MAY HAVE UNDER- OR OVER-COMPENSATED FOR THE IMPACT, IF ANY, OF CERTAIN MARKET FACTORS, SUCH AS LACK OF LIQUIDITY. SIMULATED TRADING PROGRAMS IN GENERAL ARE ALSO SUBJECT TO THE FACT THAT THEY ARE DESIGNED WITH THE BENEFIT OF HINDSIGHT. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO ANY THAT MAY BE SHOWN OR DISCUSSED.

IN ADDITION, HYPOTHETICAL TRADING DOES NOT INVOLVE FINANCIAL RISK, AND NO HYPOTHETICAL TRADING RECORD CAN COMPLETELY ACCOUNT FOR THE IMPACT OF FINANCIAL RISK IN ACTUAL TRADING. THE ABILITY TO WITHSTAND LOSSES AND TO ADHERE TO A PARTICULAR TRADING PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS THAT CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE NUMEROUS OTHER FACTORS RELATED TO THE MARKETS IN GENERAL, OR TO THE IMPLEMENTATION OF ANY SPECIFIC TRADING PROGRAM, THAT CANNOT BE FULLY ACCOUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS, ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS.

4. Risk of Loss in Futures Trading

Trading futures and other leveraged derivatives involves substantial risk of loss and is not suitable for every person. Leverage can work against you as well as for you, and market conditions can change rapidly and without warning. In live markets it is possible to lose more than an intended or anticipated amount. Past performance, whether actual or simulated, is not indicative of future results. You should never trade with money you cannot afford to lose, and participation in an FFN program does not eliminate, reduce, or transfer the risks inherent in futures trading.

No trading strategy can eliminate risk. Strategies using combinations of positions, such as spreads, can be as risky as outright long or short positions. Contingent orders, such as stop-loss or stop-limit orders, will not necessarily limit losses to intended amounts, because market conditions — including gaps, halts, fast markets, and limit moves — can make it impossible to execute such orders at, or near, the intended price. Day-trading strategies carry additional risks, including exposure to leverage, competition with professional traders, and the cumulative effect of commissions and fees on net results.

5. Live-Funded Accounts

A sim-funded trader may be transitioned to a live sub-account held with FFN's FCM partners, solely at FFN's discretion and in accordance with FFN's published rules. Live-market execution differs from the

simulated environment: slippage, partial fills, latency, liquidity gaps, volatility events, and trading halts can all cause live results to differ materially from simulated results. Performance achieved in a simulated account may not be replicable in a live account.

Capital in live-funded accounts is provided by FFN or its partners and at all times remains their property. Traders do not deposit funds into, and do not hold any ownership interest in, live-funded accounts. Continued access to a live-funded account, and eligibility for payouts from it, are governed by FFN's published Trading Rules and may be affected by trading losses. Any additional data or platform fees applicable to funded accounts are described in FFN's Help Center.

6. No Guarantee of Funding, Profits, or Payouts

Purchasing an evaluation does not guarantee that you will pass, receive a funded account, receive any payout, or earn any income. Many participants do not complete the evaluation successfully, and you may incur recurring subscription fees, activation fees, or reset fees without ever receiving a payout. All payouts are conditional on full compliance with FFN's published payout rules, including minimum balance thresholds, consistency requirements, minimum withdrawal amounts, and payout caps. FFN makes no representation regarding the income, if any, that any trader can expect to earn through the Services.

7. Program Rules, Account Termination, and Forfeiture Risk

Participation in FFN programs is subject at all times to FFN's Terms of Use and published Trading Rules, including rules governing drawdown, daily loss limits, trading hours, restricted news events, consistency, contract scaling, independent trading, automated trading, and copy trading. Violations of these rules can result in consequences up to and including immediate account failure, termination of access, and forfeiture of simulated profits and pending payouts. Certain violations result in termination without prior warning. You are responsible for reading and understanding the current published rules before trading; the version of the rules in effect at the time of the activity in question will govern.

8. Fees Are Payments for Services, Not Deposits or Investments

Subscription fees, activation fees, and reset fees are payments for access to the evaluation environment, market data, platforms, and related services. They are not deposits, are not trading capital, are not investments in FFN or any fund or pool, and do not confer any ownership, equity, or profit-sharing interest in FFN. Fees are refundable only as expressly stated in FFN's published policies.

9. Testimonials and Performance Representations

Any trading results, payout amounts, or testimonials displayed on FFN's website, social media, or marketing materials reflect the experience of specific individuals in a simulated environment unless expressly stated otherwise, are not typical, and are not a promise or guarantee of similar results. Your results will depend on your own skill, discipline, market conditions, and compliance with program rules.

10. No Investment, Legal, or Tax Advice

All content provided through the Services — including educational materials, market commentary, webinars, community discussions, and support responses — is for informational and educational purposes only. Nothing in the Services constitutes investment advice, a recommendation to buy or sell any instrument, or legal or tax advice. You are solely responsible for your trading decisions and for any tax obligations arising from payouts you receive, and you should consult licensed professionals where appropriate.

11. Technology, Platform, and Data Risks

The Services depend on software, market data feeds, and third-party trading platforms and infrastructure. The Services are provided on an “as is” and “as available” basis. Outages, latency, data errors, order-routing failures, and connectivity problems — whether in FFN’s systems, your own equipment or internet connection, or third-party platforms and data providers — may prevent access to your account or affect simulated or live results. FFN and its third-party providers do not guarantee uninterrupted access or complete accuracy of data, as further described in the Terms of Use.

If you are unable to access your account for any reason, you will be unable to enter, modify, or cancel orders. An inability to access your account — whatever the cause — does not excuse compliance with FFN’s Trading Rules, including the requirement to be flat by the daily close and restrictions around designated news events. Open positions may be liquidated, and rule violations may result in the penalties described in the published Trading Rules, even where the underlying cause was a technical failure. You are responsible for maintaining reliable equipment and connectivity, and for having contingency plans (such as contacting your platform provider or FFN support) if access is interrupted. Trading during volatile conditions, including limit-move days, may make it impossible to close a position, and accounts may be liquidated as a result; FFN is not liable for such outcomes.

References to third-party tools, data, platforms, educational materials, or websites are provided for convenience and informational purposes only. FFN does not endorse or warrant their accuracy, functionality, or suitability, and is not responsible for third-party content, errors, or outages.

12. Eligibility and Restricted Jurisdictions

The Services are available only to individuals 18 years of age or older. The Services are not available to residents of jurisdictions on FFN’s published restricted-country list, which is maintained in FFN’s Help Center and may change from time to time. You are solely responsible for ensuring that your use of the Services complies with the laws of your jurisdiction, and for any registration, reporting, or tax requirements that apply to you locally.

13. Relationship to Other Documents

This Statement supplements, and is incorporated into, FFN’s Terms of Use and published Trading Rules. It does not modify them. Capitalized terms not defined here have the meanings given in the Terms of

Use. Where this Statement summarizes a program rule, the full rule as published in FFN's Help Center governs.

14. Changes to This Statement

FFN may revise this Statement from time to time. The "Last Updated" date above reflects the current version. Your continued use of the Services after a revised Statement is posted constitutes acceptance of the revision. You should review this Statement periodically.

15. Acknowledgment and Contact

By registering for, purchasing, or using the Services, you acknowledge that you have read and understood this Risk Disclosure Statement, that you accept the risks described in it, and that you have had the opportunity to seek independent professional advice.
