

RADISSON COLLECTION HOTEL, BASILICA BUDAPEST

OVERVIEW

Located directly on St. Stephen's Square, the Radisson Collection Hotel, Basilica Budapest offers an intimate experience that blends historical elegance with contemporary design. As the only hotel in Budapest with uninterrupted views of St. Stephen's Basilica, it provides a unique vantage point on the city's neoclassical grandeur.

With just 71 guest rooms and suites, three thoughtfully curated dining concepts, and a wellness-focused approach to hospitality, the hotel serves as a serene escape within the bustling city. Its central location places guests moments from architectural icons including the Parliament Building, Chain Bridge, and State Opera House. During the winter season, the surrounding square transforms into one of the city's most atmospheric Christmas markets, creating a festive experience steps from the lobby.

HERITAGE ART & DESIGN

Occupying a prominent position opposite St. Stephen's Basilica, the hotel reflects the architectural refinement of its surroundings, from antique-style lighting and arched windows to modern graphic panels.

The interiors utilise clean lines, neutral palettes and natural materials like soft woods, warm veining and muted leathers to create a minimalist yet sophisticated feel, allowing the St. Stephen's Basilica to command full attention. Budapest's cultural backdrop, rich in Art Nouveau and subtle contemporary art, is also subtly woven into the hotel's identity.
