ABOUT US

We are the second generation of the project born in 1957 in a small carpentry workshop that has struggled for decades to innovate and always be one step ahead in the manufacture and installation of the best enclosure systems.

Nowadays, with the incorporation of the third generation, modernity, design and personalised attention set us apart from the competitors.

From the nobility of wood to the avant-garde of modern materials, our evolution has been founded on the unchanging quality that defines each project.

WHAT WE OFFER

We offer innovative and versatile large-format customised enclosure solutions designed to meet each customer's expectations.

We adapt the designs to each project using advanced technology and cutting-edge materials, enriching each solution with the know-how we have accumulated over years of experience in the sector.

We provide comprehensive and personalised technical support, working closely with the customer to ensure close collaboration and complete satisfaction from project conception to completion.

MINIMA

SLIDING / FIXED

MINIMA SL 42

System for sliding doors with frames and panels up to 5,5 m high.

Sections 135 mm frames and 51 mm panels.

Minimalist 25 mm central node.

Glazing up to 42 mm.

Maximum weight of 600 kg per panel.

Double thermal break of 18 mm.

Possibility of lower frame with through-floor and multi-rail.

MINIMA SL 32

System for sliding doors and windows with frames and panels up to 2,7 m high.

Sections 116 mm frames and 42 mm panels.

Glazing up to 32 mm.

Maximum weight up to 300 kg per panel.

Thermal break of 28 mm in frames and 14 mm in panels.

Possibility of lower frame with through-floor and multi-rail.

It completes the range of minimalist sliding doors.

MINIMA

TILT&TURN / FIXED / FOLDING

MINIMA PR 72

Tilt/turn system with concealed panel with maximum dimensions of 1,4 × 2,4 m per panel.

Optional concealed fittings.

Optional frame with concealed drainage.

Option of standard (101 mm) or reduced (81 mm) visible reversing crossover profile.

Double or triple glazing up to 36 mm.

Maximum weight of 150 kg per panel.

MINIMA PR 72 CLASSIC

Casement/window system with concealed panel with visible glazing bead of maximum dimensions per panel of 1,4 × 2,4 m.

Total visible cross-section reduced to 76 mm.

Straight, stepped or chamfered 16 mm glazing bead. Optional adhesive beading.

Glazing up to 34 mm.

Maximum weight per panel 150 kg.

The ADVANCE series redefines excellence in aluminium window systems, ideal for advanced architectures that demand support for **large formats** and weights.

This system stands out for offering a unique combination of robustness and refined aesthetics, guaranteeing high acoustic and thermal performance.

FINISHINGS: lacquered colours (RAL, mottled, rough), wood effect, anodised, possibility of bicolour.

OPENINGS

ADVANCE SL 103

ADVANCE

SLIDING / FIXED

ADVANCE SL 103 / SL 103E

In-line sliding or lift-and-slide opening with maximum dimensions per panel of 3.3 x 3m. Thermal break. 115 mm frames and 55 mm panels, with minimalist central crossover. Glazing up to 32 mm. Weight per panel up to 400 kg (lifting) or up to 200 kg (in-line). Possibility of installing security dampers for closing.

ADVANCE SL 93 / SL 93E

Sliding in-line or lift-and-slide opening with maximum dimensions per panel of 1.4 (in-line) or 1.7 (lift-and-slide) x 3m. The width of the panels is determined by the thickness of the glass. Thermal break. 100 and 160 mm frames, with minimalist central crossover. Glazing up to 26 mm. Weight per panel up to 200 kg (lift and slide) or up to 160 kg (in-line).

LUXGLASS

BALUSTRADE CURTAIN WALL SKYLIGHT

The avant-garde architecture includes elements such as skylights, balustrades and curtain walls, which add the final touch of elegance to the projects.

The zenithal light passing through the skylights illuminates the spaces with natural light. Rail railings, button railings or stainless steel brackets delimit spaces with invisible barriers. And curtain walls offer elegant facades that improve insulation and views.

Our team of technicians studies each project to integrate the best solution in each case.

Adapted to the needs of each client, our solutions help transform each project into a masterpiece of light and design.

ROOM DIVIDER
MAJORCAN DOOR
BIOCLIMATIC PERGOLE

Ensuring elegance and functionality, our **room dividers** create seamless transitions between rooms, both indoors and outdoors, offering flexibility and unobstructed views.

Majorcan doors add a traditional yet functional charm, providing privacy and ventilation.

Bioclimatic pergolas, fixed or mobile, adapt to weather conditions, improving outdoor comfort and extending living spaces.

ROLLER BLIND SHUTTER MOSQUITO NET

The added value to our windows is a complete range of **roller blinds**, with which we add light control, aesthetics, design and comfort. We have conventional and large-format automatic models.

The **shutters** provide security and privacy, adding aesthetic value. Standard, adjustable, high security or large format fabrics make up our catalogue.

Mosquito nets ensure a bug-free environment, allowing fresh air in while keeping pests out. We have roll-up, sliding or **large-format** models depending on the chosen carpentry.

The ESSENTIAL PVC series offers a robust structure in PVC windows and doors, offering exceptional thermal insulation combined with a refined design. Ideal for those seeking **energy efficiency** and durability, it ensures comfort and style with its solid and efficient construction.

OPENINGS

ESSENTIAL PVC

TILT&TURN / FIXED / FOLDING / DOORS / SLIDING

Our difference lies in the wide variety of profiles with which we manufacture our PVC windows, with any of the configurations required by the project.

With the incorporation of the ESSENTIAL EDGE range, we achieve the best acoustic and thermal insulation, as well as a modern and stylish appearance, with maximum dimensions of 1.4 x 2.4 m and a maximum weight of 100 kg per panel.

Windows and doors, tilt and turn or sliding, offer maximum dimensions of 2.4 m and maximum weight of 300 kg (in-line) or 450 kg (lift-and-slide) per panel. Glazing up to 40 mm.

In addition, with the innovative **ACRYLCOLOR** technology, we can guarantee colour durability for life, regardless of time or exposure to weather conditions.
