

---

**Which of the following best describes your situation?**

Farmer/producer

---

**Are you responding on behalf of an organisation or industry body?**

No

---

**How would you like to respond?**

a. Answer discussion paper questions via the online survey

---

**What are the opportunities to reduce emissions and build carbon stores in agriculture and the land? What are the main barriers to action?**

This opening comment by you is propaganda. Climate change is already affecting Australia's producers and the environment. Reducing emissions is critical for reducing future climate risks for the agriculture and land sectors, as well as ensuring our industries are well-placed to compete in global markets. Australia is committed to taking action on emissions and both the agriculture and land sectors have an important role to play in supporting our national contribution to global efforts. (Page 9). Climate change is NOT already affecting Australia's producers. Reducing 'emissions' is NOT critical for reducing future climate risks. The hoax & fear mongering that 'climate change' (aka ex-global warming) pushed by the UN, & followed by the Australian Federal Government is a confidence trick.

---

**Are there initiatives or innovative programs underway that could be applied or expanded on at a national scale?**

Yes. For the Australian Federal Government to drop the hoax & lie that 'emissions' are the cause of climate change. It's a sad, sinful hoax to trick the people it's being played out on.

---

**How can the Australian Government bring together existing effort and new initiatives into one coordinated plan?**

For the Australian Federal Government to drop the hoax & lie that 'emissions' are the cause of climate change. It's a sad, sinful hoax to trick the people it's being played out on.

---

**What are the most important options to be further adopted or supported, looking in the short and the longer-term?**

For the Australian Federal Government to drop the hoax & lie that 'emissions' are the cause of climate change. It's a sad, sinful hoax to trick the people it's being played out on.

---

**What are the practical solutions to increase uptake?**

There is no effect on climate caused by emissions.

---

**How do you see the agriculture and land sectors contributing over the medium and longer-term? What are the opportunities to deliver emission reductions in parallel with wider goals?**

Emission goals??? UN Agend 2030 hoax.

---

**How can the Australian Government better support agriculture and land sectors to:**

**a) drive innovation**

**b) build capacity**

**c) ensure the system enables emissions reductions**

There is no effect on climate by emissions, therefore there is no requirement for emissions reduction. It's a hoax.

---

**What new initiatives could the Australian Government design that would support emissions reduction and carbon storage in agriculture and land and help ensure a productive, profitable, resilient and sustainable future for the sectors?**

There is no effect on climate by emissions, therefore there is no requirement for emissions reduction. It's a hoax.

---

**A consistent and trusted approach for assessing and reporting emissions is often raised as a barrier to reducing emissions. Is there a role for the Australian Government in addressing this concern, and how can producers and land managers be supported?**

There is no effect on climate by emissions, therefore there is no requirement for emissions reduction. It's a hoax.

---

**What skills, knowledge and capabilities do you think producers and land managers need to implement change? What information and data would help them make decisions about emissions reductions and sustainable land management in the short and longer-term?**

There is no effect on climate by emissions, therefore there is no requirement for emissions reduction. It's a hoax.

---

**Do you have any additional views or feedback that you would like to include in your response?**

There is no effect on climate by emissions, therefore there is no requirement for emissions reduction. It's a hoax.

---

**Is your response confidential?**

No

---

**Do you agree to your response being published on our website?**

Yes

---

**Please de-identify my response**

Yes

---

**I have read and understood the privacy notice and consent to the collection, use and disclosure of my personal information as outlined in the privacy notice.**

Yes

---

**Confirm that you have read and understand this declaration.**

Yes

---
