

I would like to start by saying I support this phase out and want certainty that this trade will end. To that end I would like the phase out to be legislated and begin in this term of Parliament. I would also like the phase out to begin and end as soon as possible.

As this is going to effect the livelihoods of farmers, I would like to see support to help them transition to something new. By allowing this trade to continue it undermines Australia's reputation as a fair and compassionate nation. During the last election the hope of ending live export was one of the reasons I supported the Labour party. In the end this is an inherently cruel industry that needs to be stopped.
