

END LIVE EXPORT!

I am writing about an issue close to my heart and that is "Live Exporting", and welfare of animals! On this day and age I do not understand where the humanity and compassion has gone from people who make the decisions of animal welfare and I must say that sometimes I wonder how these people can sleep at night when they are allowing thousands and thousands of vulnerable, defenceless sheep suffer this inherently cruel practice. Not forgetting the fact that when these ever so unfortunate animals born into the meat market, who ever makes it alive, are put through some unbelievable cruel treatment before finally death, in most inhumane way, ends it all.

Australians like myself want to see live exporting to end, and as it was one of the election promises, we expect Labour Party to keep their promise.

Lastly I would like to say that our farmers keep this country running and need total support from government.

Kind Regards
