

[https://vaci.voiceless.org.au/countries/australia/#:~:text=Rank%2034,%22\)%20under%20the%20same%20index.](https://vaci.voiceless.org.au/countries/australia/#:~:text=Rank%2034,%22)%20under%20the%20same%20index.)

Ranking compares how civilized countries behave towards animals and what are the levels of animal protection.

Ban on Live Export would improve Australia's international reputation and ranking, and gain respect for its efforts.

The Industries

There are thousands of workers involved in Live Export. I understand wait time and anxiety involved in the process (I have lost employment in architecture due to family demands and retrained to gain different employment).

Producers/industry defending status quo and so-called improved standards make situation even worse. They hold many workers from looking for meaningful requalification and gainful employment.

Labour Government will assist in the transition to new workplaces and to change to non-cruel production, hopefully plant production which is both environmentally friendly and cost effective.

Thank you for reading,

Kind regards,
