ATTN AUSTRALIAN GOVERNMENT

RE: ENDING LIVE SHEEP EXPORT

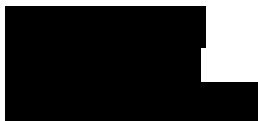

As someone who voted for Labour based on their assurance this would end, I would like the process for ending this to be confirmed **urgently.**

It is a barbaric, cruel practice and is not representative of the fair and compassionate nation that Australia wishes to be, and I would like to contrast this with the stance that our progressive neighbour New Zealand has taken.

Perhaps farmers will need some kind of support from the government to transition away from the current process, but I'm sure that Labour would have factored this into their pre-election assurances already?

Please make good on these promises and show the compassion that as a civilised nation we say that we endorse.

Yours faithfully,
