

To Whom It may Concern,

As an Australian Citizen I would like to see the end of the live export of Sheep (and all livestock for that matter) and to have a guarantee, by the government, of when that will be finalised by.

I propose this is implemented as soon as possible, and completed by Jan 2025.

The live export of Sheep/Cattle etc is barbaric, and we can't as a civilised country continue to support an activity that causes so much suffering, in the name of economics. There has to be a better way

I support farmers being offered financial support to assist them with this transition so that they don't suffer either.

As an Australian the fact that it has taken so long to get to this position and STILL we continue export livestock is something I find unbelievable and it has undermined my trust in the Agricultural Sector.

Perhaps we could consider humanely slaughtering animals in Australia and exporting the meat as opposed to live animals.

Yours Kindly,
