

To Whom It May Concern,

My submission is not long. In fact, it is quite simple.

I support the phase out of the live sheep trade. Part of my vote for Labor at the last election was because of the commitment to end this trade, and I am glad to see the Government taking steps to keep this promise.

I hope the trade is phased out as soon as possible, and I trust that the process will be legislated and commence during the current term of government. I would also support the Commonwealth providing financial support to farmers while the phase out occurs.

Australia is a humane and compassionate nation, and taking steps towards ending the live sheep trade will further supports this conclusion. The live sheep trade is inhumane and cruel, and eliminating the trade will further Australia's reputation as a modern, fair and compassionate country.

I look forward to seeing the trade ending as soon as possible.

Thank you for taking my comments on board.

Kind regards,
