

It is time to end live sheep exports.

Given the weight of evidence that shows that live export practices are extremely detrimental to the animals, along with the studies that highlight that the financial impact would be minimal (https://daff.ent.sirsidynix.net.au/client/en_AU/search/asset/1031441/0). I strongly encourage the government to honour it's promises and put an end this extremely cruel industry.
