

Phase out of live sheep exports by sea

To conduct it orderly, support affected farmers with an assistance package over the period to transition to another means of livelihood that does not involve animal exploitation.

Phase it out in a short period of 3 years instead of over a prolonged period. There must be certainty that it will end through being legislated.

Commence the phase out at the start of the next parliamentary term and end phase out when the 3-year parliamentary term ends.

I fully support a phase out of this sea trade and want it to commence at the start of the next parliamentary term.
