

Have Your Say | Live Sheep Phase Out Consultation
Department of Agriculture Fisheries and Forestry
livesheep.phaseout@agriculture.gov.au.

12 June 2023

A phase out is an unacceptable outcome and we do not support the policy.

LiveAir Incorporated is an organisation committed to fairly representing stakeholders such as Livestock Exporters, crate manufacturers, transporters, export depots and specialist freight forwarders involved in the live export of livestock by air freight globally ex Australia.

LiveAir is opposed to the Live Sheep Phase Out Policy and supports the submission by Australian Livestock Exporters Council on this matter.

LiveAir feels it is important that the independent panel listens and understands the advancements across all sectors of the Live Export Industry in recent years, improvements in community sentiment, benefits of the Australia trade to overseas communities, entire value to Australian communities and gauge the entire efforts the whole Live Export Industry focusses on Animal Welfare as a first priority at every level.

The Phase out of Live Sheep Trade by Sea will have a dramatic effect on Australia's global trading reputation and is expected to have a disastrous, domino effect on Australian agricultural commodities and we reiterate that LiveAir does not support the phase-out outcome.

Yours sincerely

Simon Jackson
LiveAir Chairman
