

We need to put an urgent end to all animal live export. This practice is beyond cruel and completely unnecessary, especially in this day and age, with so many alternative eating choices available. Live export is driven by money and takes nothing else into consideration. The treatment of these innocent farm animals, leading up to being forced onto the ships, the horrendous long and treacherous journey on the ships and meeting their horrible fates at the end, by humans who don't care at all for animal welfare, is absolutely mortifying and scarier than any horror movie. This is real life and we are treating innocent animals worse than we treat the most dangerous criminals! Why is that? This question cannot be answered logically. Quite frankly the general public are fed up and this cruelty needs to end now.

The drawn out fear, discomfort, pain and torture that all the innocent animals experience is a direct cause of human greed.

There is so much evidence proving that animal agriculture is one of the leading causes of climate change and live export only exacerbates the issue. Please, we need to end this. Let's be a generation of positive change, not evil.
