

My submission as a member of the public

As a global community we need to take the first step as developed nation to educate others across the globe that as part of moving towards ensuring a sustainable future and liveable planet and heed that all animals need to be treated kindly...which in this day and age is a 'no brainer', do the right thing and legislate to end live sheep export now and support and fund Australian farmers to make the needed transition to a kinder alternative. Set the end date this term of Parliament so that we don't continue to sink lower in our international reputation.
