

## Submission to the Panel for the Phase out of Live Sheep Export by Sea

Those of us, Stakeholders, at the [REDACTED]  
[REDACTED], 23 heard unequivocally and without qualification from speaker, [REDACTED] on board vet of 13 years tenure, that the Awassi Express episode was without qualification an act of funded sabotage.

We with financial interest, the only Stakeholders have long suspected the above. Non –stakeholders, for example, the disingenuous RSPCA and now Minister Watt with his Inner City Green Influencers, of course choose the non secular script.

Because the farm gate price for all farm production has seasonal, historic, volumetric, off shore and perceptive components. Real stakeholders do not subscribe to obtuse abstraction. We can't .We have credit to reconcile.

Post April 19, 2023 has seen in our part of the [REDACTED]  
[REDACTED] without rainfall and farm-gate free-fall in Live Sheep Export price equivalent. Just as the non-stakeholder RSPCA would wish. The Glyde Committee will remember 'Adrian' suggesting - no better home for a 60-70 kg merino wether than on board for 22 days.

No Live Sheep Exports from the Federal seat of O'Connor, Panel, means No LSS: (live export trader and transporter of thousands of WA sheep and Halal abattoir operators at Beaufort River and Hillside) this already means compromised Farm Gate value for this Stakeholder with secular Social License and more importantly jeopardized Human Welfare outcomes in the similarly secular Democratic Kingdom of Jordan.

Panel, you have an opportunity for non -stakeholder redemption.

Heather Neil's Animal Welfare consideration can now include, a shearing industry stakeholder, portfolio examination.

We start May 25. At least our stakeholder sheep will be dry.

Rod Moir.

PS: Panel, anything less than your report being received by all those who attended the WA meetings at the very same moment Minister Watt receives it, is unacceptable.
