

To Whom It May Concern:

The live export industry must be phased out for all animals as soon as possible.

Other species are not ours to do whatever we want with. Animal agriculture must be phased out as soon as possible. It doesn't belong in the 21st century. Imprisoning, sexually violating, torturing – mentally, emotionally and physically – and killing animals at a fraction of their natural lifespan is cruel and immoral. There is no humane way to kill someone who values their own existence and doesn't want to die. And as we would have no control over how the animals are being treated and killed overseas, it makes the export industry one of the worst offenders.

There is no excuse for animal abuse. Human beings need to treat the natural world and all its inhabitants with respect and care to create a world worth living in for everyone.

Please help to put an end to the barbaric practice that is animal agriculture.

Yours sincerely,

Tanya James
