

Dear Government,

I write to you begging you to stop live animal export.

We are a better country than this. Australia is known for its fair go attitude and helping the underdog. The world looks to us as a kind compassionate country that can make its own decision has and stand by them.

Live export is an unnecessary cruelty that belongs in the dark ages when people did not know better.

Please legislate the phase out and begin it soon so we your voting public can have faith in a kind government.

I support farmers living in a farming area. They work hard and respect their stock and produce. Please support them to transition.

Kind regards,

Zoe Adams.
