## Australian Standards for Export of Livestock – Update 3.3

### Rejection criteria table - Air

Standard 6 covers the standards that relate to the sourcing, preparation, land transport and export of livestock by air.

The proposed amendments to the standard/s appear below in tracked changes. Text proposed to be deleted will appear struck out.

#### General and all species requirements

**Table 23 Rejection criteria for all species by air**

Category	Rejection criteria
General requirements	<ul style="list-style-type: none"><li>• Failure to meet importing country requirements including sex or breed if specified</li><li>• Pregnancy status not confirmed as appropriate for export</li><li>• Viral diseases such as scabby mouth or infectious bovine rhinotracheitis</li><li>• Animals displaying clinical signs of infectious or contagious disease or of external parasites</li><li>• Animals showing signs of injury such as but not limited to fractures or swelling</li><li>• Evidence of imminent parturition</li></ul>
Systemic conditions	<ul style="list-style-type: none"><li>• Body condition score not appropriate for export (such as emaciated or over-fat)</li><li>• Anorexia (inappetence or 'shy feeders')</li><li>• Uncoordinated, collapsed, weak</li><li>• Unwell, lethargic, dehydrated</li><li>• Ill-thrift</li></ul>
Gastrointestinal system	<ul style="list-style-type: none"><li>• Dysentery or profuse diarrhoea</li><li>• Bloat</li></ul>
Musculoskeletal system	<ul style="list-style-type: none"><li>• Abnormal gait or lameness of any kind</li><li>• Abnormal soft tissue or bony swellings</li></ul>
Nervous system	<ul style="list-style-type: none"><li>• Nervous symptoms such as head tilt, circling, incoordination</li><li>• Abnormal or aggressive behaviour/intractable or violent</li></ul>
External/skin	<ul style="list-style-type: none"><li>• Generalised papillomatosis or generalised ringworm or dermatophilosis</li><li>• Generalised and extensive buffalo fly lesions</li><li>• Generalised skin disease or infection</li><li>• External skin cancer</li><li>• Lacerations that penetrate the full thickness of the dermis or are likely to affect the health or welfare of the animal</li><li>• Discharging wounds or abscesses</li><li>• Cutaneous myiasis (flystrike)</li></ul>

Category	Rejection criteria
	<ul style="list-style-type: none"> <li>Balanitis (pizzle rot in sheep)</li> <li>Blood/abnormal discharge from reproductive tract (vulva/prepuce)</li> <li>Visible external parasites</li> </ul>
Head	<ul style="list-style-type: none"> <li>Blindness in 1 or both eyes</li> <li>Cancer eye</li> <li>Keratoconjunctivitis (pink eye)</li> <li>Excessive salivation</li> <li>Nasal discharge consistent with signs of a contagious or infectious disease</li> <li>Coughing consistent with signs of a contagious or infectious disease</li> <li>Respiratory distress-difficulty breathing</li> <li>Sharp horns</li> <li>Horns <del>that would cause causing</del> damage to the head or eyes <u>of the animal or other animals</u></li> <li><u>Horns that would endanger the animal or other animals</u></li> <li><u>Horns that would restrict access to feed or water</u></li> <li>Bleeding <u>and/or not fully healed</u> horn stumps or broken antlers</li> <li>Horns longer than appropriate for export</li> <li>Scabby mouth</li> </ul>
Other	<ul style="list-style-type: none"> <li>Groups of animals with unusual mortalities</li> <li>Disparities in sex, size, weight or age that could cause an issue with the health or welfare of the animals (redraft animals in this case)</li> </ul>

## Rationale

### Rejection criteria for all species by air

The proposed changes to Table 23 Rejection criteria for all species by air include the proposed changes as outlined in the 'Penning requirements for horned cattle and sheep' papers.

The animal welfare risks that the proposed changes to Table 23 attempt to manage are:

- damage to the head or eyes of the animal or other animals,
- restricted access to feed or water,
- endangering the animal or other animals, and
- export of livestock with horns that are not fully healed (for example, are scabby and bleeding).
