Subject: Submission Supporting Renewable Energy for a Sustainable Future

I strongly support the Australian Government's inquiry into community engagement in renewable energy projects. It is crucial that communities have a say in planning and developing clean energy infrastructure to combat the climate crisis.

Communities must be treated as stakeholders in Australia's energy transition to ensure fair outcomes and numerous benefits. Our government should invest in sustainable jobs, lower power prices, co-benefits for farmers, and cleaner air for all.

Building renewable energy infrastructure is essential to reduce emissions and avoid climate chaos. We cannot risk increased reliance on coal and gas power.

First Nations communities should have consent rights for projects on their Country and be able to participate in and benefit from the transition.

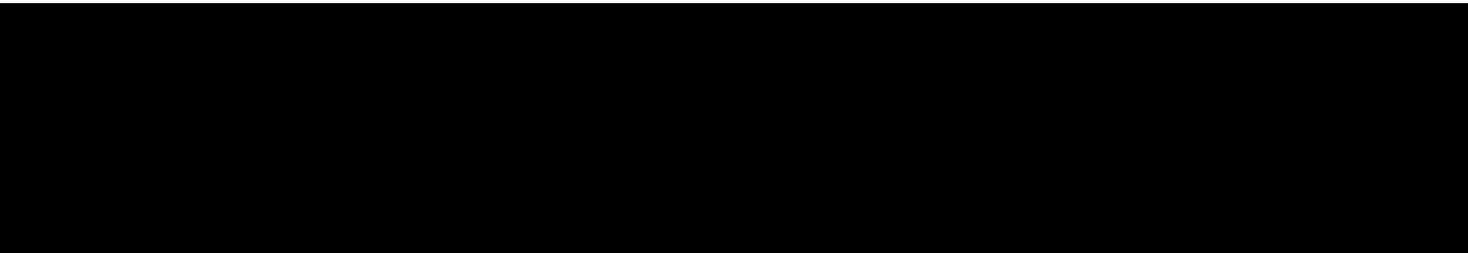

Nature suffers from delays in transitioning to renewables. Coal and gas burning is drying up rivers, killing the Great Barrier Reef, and subjecting communities to extreme heat.

This inquiry is an opportunity to support the necessary transition, prioritize community engagement, and ensure benefits for everyone and nature.

We should call on the Australian Government to lead and act for the clean energy future our communities and environment deserve.

Sincerely,

Yours sincerely,
