the climate crisis is upon us there needs to be serious action from the government to move to renewables and sustainability.  
Stop supporting the status quo by subsidising fossil fuels and approving new projects and endorsing dangerous technologies like fracking.  
Encourage a faster take-up of renewables. Don't extend coal power. provide discounts to encourage home/community batteries for base load power.  
Stop the silly schemes that waste money like the carbon credit rorts. Paying people to keep carbon in the soil which is simply good farming practice!

Yours sincerely,
