Subject: Submission to the Community Engagement Review on Renewables

Good evening

Thanks for the opportunity to comment. I'm deeply concerned about the climate crisis and I know that it is caused by excessive production and use of fossil fuels. Here in South Australia we use large amounts of renewable energy for electricity generation. The SA government still claims that gas is essential but we know that we can be 100% renewable especially by using large batteries which would also reduce the need to replace or expand the transmission network. We could also be exporting technology overseas and we could be training our near neighbours to understand and deploy renewable energy

Yours sincerely,
Catherine Cox
