Hi,  
I am self employed and pay my tax.  
I currently put all my earnings into transitioning my property to renewable energy and bushfire protection. I also spend a great deal of time and effort into growing as much food as I can. This is as much as I can do as one person to reduce my carbon footprint. It would seem a bit lazy on the part of government to let those who are able lead the way to a sustainable existence.  
There is so much a government could do if it was truly dedicated to reduce and then stop greenhouse emissions. The longer it is postponed for the sake of getting value for money out of existing infrastructure the worse the problem becomes.  
Please, at least make it easy for us to do all this work for you. Or, get your act together and fund renewable projects instead of fossil fuels and retrain the people who work on them.  
Hurry up.

Yours sincerely,
