**Subject:** Submission to the Community Engagement Review

I support the speediest possible transition to renewable energy, away from fossil fuel dependency, and most certainly avoiding any dalliance with nuclear energy.

It is important to maintain a social license, and so fine grained consultation must be undertaken with local communities, most of whom support the roll out of renewables and want to share the obvious benefits, but do not want to be shouldered with more than their fair share of any burdens needed in getting there.

Yours sincerely,

[REDACTED]
