Dear Panel

We are all aware that we are on a rapid trajectory toward irreversible Climate Change. There are signs of this everywhere in the world, it is impossible to pretend there is nothing wrong. We know that the major cause of this is the emissions that arise from burning Fossil fuel, Without reducing these globally and immediately, we face a catastrophic future. No amount of offsets alone will stop this, we must source renewable energy NOW. Why are we giving money to the Coal mining industry when that money should be going into investment for renewables?

It has been proven that there is more employment in the Renewable industry, Yes we know that we still need coal too provide energy now but we are not transitioning quickly enough. This is an emergency to the survival of life on this planet, we have to act now.

The pathway to complete change is laid out: we simply have to do it. I will no longer vote for any party that is not putting this as a priority. This is our number 1 problem: the cost of inaction means no future for the next generations. How can we allow this to happen?

Please listen to the overwhelming majority of Australian voices pleading for more action before it is too late.
