**Subject:** Submission to the Community Engagement Review

To whom it may concern, which is all of us.

For a safe climate and our economic prosperity, we need to urgently build enough renewable energy to electrify everything and transition away from coal and gas for our domestic use and exports.

A well-designed energy transition gives us opportunities to not only mitigate climate change but also protect and regenerate nature, create meaningful and sustainable opportunities across our economy, ensure more reliable and affordable access to energy, and provide energy security with price stability, so that people and nature can both thrive.

If we do this right, ALL OF US can benefit through lower power prices, local jobs and economic development, community enhancement and renewal, cleaner air and more robust ecosystems.

ALL OF US can benefit if it is done in a way that is just, equitable.

ALL OF US can benefit if State & Federal governments make sure nature, communities, workers and consumers are protected as we transition away from fossil fuels.

ALL OF US can benefit but only if we make haste. The clock is ticking. We need to stop burning all coal and gas and replace it with renewables NOW and ALL OF US need to have a say in how that's done. For that we need recommendations FOR ALL OF US NOW.

Yours sincerely,
