To all, Who it does concern,

We can meet our needs through renewables. The technology is available we just have to fund it.

Racing towards making the planet uninhabitable is unnecessary and appalling.

Renewables offer the possibility of a more local, and so more resilient power supply. It should be owned by citizens not corporations. Citizens care for sustainability, corporates for profit. This can come through government ownership or through government making loans to local co-op's or similar measures.

Yours sincerely,
