I wish to advise that I fully support the transmission to renewable energy as quickly as possible and have personally installed solar pv panels and a battery at my residence

It is clear that human induced climate change is causing extreme weather events of catastrophic bushfires, droughts and floods throughout the world and the disasters they cause to the natural and built environment and devastation of habitat including of millions of people.

The Federal Government must take a strong lead in the reduction to zero emissions by the phasing out of fossil fuel powered energy and the adaptation of clean renewable energy sources and totally resist the powerful and cashed up fossil fuel companies attempts to derail the transmission.
