To  
The persons conducting the Community Engagement Review.

Dear compatriots,  
Please consider the following:

Since the time our species appeared on Earth there has never been a more critical time to deeply consider the impacts our species has had on this planet (our one and only; and critical life support system) Whatever economics are involved, they are really irrelevant to the argument.

However, in this country we are probably best positioned compared to all regions of the planet.

We have an almost perfect set of resources to lead the way in the essential changes that must be made.

We have unlimited sun, wind, water and tidal power to drive this conversion as well as the necessary minerals and technology to carry this out.

We have already demonstrated that renewables are up to the job of powering our country.

What are we waiting for?

More raging bushfires?

More unprecedented floods?

More heartbreaking droughts ?

We have nothing to lose and everything to gain by accelerating the move to more renewables.

Yours sincerely,  
[REDACTED]
