To whom it may concern,  
I am writing to request that the federal government show strong support for renewable energy. If this happens, destruction of land, and commandeering of water supplies will end. Furthermore, I know that renewable energy is much cheaper than coal or gas fired electricity, because I have used solar energy for the past two years. My bill for the past month has been only \$50, yet I live in cold Melbourne, and use only electric heating.

Please do not permit or fund any more fossil fuel projects. Instead, please direct the money to renewable energy projects, to prevent destruction of the environment and restrain warming of the atmosphere.

Yours sincerely,
