We urgently need to slow down the usage of fossil fuels for all of our energy needs. Time and again we have seen the devastating impacts of climate change on our environment and lively hoods.

Stop receiving political donations from the fossil fuel companies with vested interests, these companies carry on like there is NO Tomorrow and if we keep increasing our pollution outputs there will be NO Tomorrow.

The power companies reducing Solar Panel Feed in Tariffs has probably scared off many people considering putting Solar on their premises. All of our hands are tied with the expensive cost of Backup Batteries for Solar systems, so we have to rely on those old clunkers of Power Stations for a while longer.

Yours sincerely,
