Indicative distribution mapping

Map units most likely to contain the ecological community (over-represents the extent in some areas)

Contextual data

- Cities
- Towns & Localities
- State Border
- Roads
- Major Rivers
- Lakes/Reservoirs
- Non-perennial Lakes
- Conservation Areas

Distribution data source: selected map units from: NSW State Vegetation Type Map (SVTM) mapping (PCT's 3054 and 4106 - PCT's 3028, 3046, 3036 and 3077 are included where they are associated with records of diagnostic tree species and occur above 400m asl); Victorian Ecological Vegetation Classes (EVC) and Rainforests of Victoria mapping (for Warm Temperate Rainforest in the Howe Range area); and SEAP modelled rainforest data (C4b). Refer to the draft Conservation Advice for further information.

Contextual data sources: DCCEEW; Geoscience Australia; PSMA Australia; Australian Bureau of Statistics; CSIRO.

Caveat: The information presented in this map has been provided by a range of groups and agencies. While every effort has been made to ensure accuracy and completeness, no guarantee is given, nor responsibility taken by the Commonwealth for errors or omissions, and the Commonwealth does not accept responsibility in respect of any information or advice given in relation to, or as a consequence of, anything containing herein.

This map was produced by the DCCEEW Geospatial Data Assets team.
