DRAFT Greenhouse Gas Emissions Estimation and Reporting Guidelines for Agriculture, Fisheries and Forestry

Addendum – corrections to Common
Requirements Framework and Chapter 16
LULUCF Methodological Guidance

Corrections

Common Requirements Framework

Page 32, Line 31 & 32

The sentence should include the additional text in red:

If the output is **not the main product but** has a subsequent use and is sold, it is classified as a by-product

Chapter 16 - Land Use, Land Use Change and Forestry Methodological Guidance

Question Set 2 – Question number 1

The question should read:

"The Guidelines propose that if an entity is unable to find any evidence of past activities meeting the conditions outlined in Section 1.3, no relevant activities are deemed to have occurred. In the case of land clearing, an entity should document the efforts they have undertaken to identify whether any clearing has occurred in the past 20 years. Are these rules appropriate? Is there a need for any additional evidence requirements?"
