

# TRASH IS CASH.

**6 000 000 000** pounds

of brewers grain is produced in the United States each year.

Majority of that is simply dumped to **landfill** sites,

creating an evergrowing **cost**,

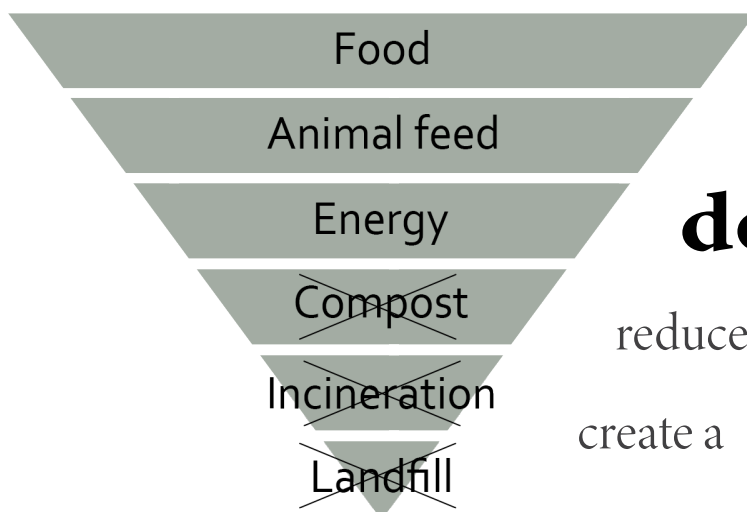

transportation problems

and an **environmental nightmare**.

That is a lot of **wasted revenue**.

Spent grain is a valuable resource and can be reused in many ways and provide for completely new business opportunities.

Replacing regular flour with spent grain in bread will

**double** the fiber content,  
reduce calorie content with **7%**,  
create a **50%** increase in protein  
and increase essential amino acids by **10%**

By adopting the Exergy superheated steam dryer you will transform your **waste** to **value** by dehydrating it with superheated steam, converting loss to revenue.

Exergy steam drying technology does more than just drying. The dried product gains many unique benefits and improvements compared to other drying methods.

**100%** sterilized product  
increased **shelf life**  
**Higher** market value  
Fiber **expansion**  
**No** risk of contamination  
higher protein **value**

We provide a dryer that will reduce your carbon footprint, reduce your water usage, reduce energy consumption and reduce the production cost, all while you increase the production safety and reliability.

Create new opportunities with the most energy efficient and green dehydration solution with the lowest life cycle cost in the world.

**We can help you with your waste.  
Let's talk.**
