

IMAGINE GETTING 85% OF THE FUEL BACK EVERY TIME YOU FILL UP YOUR CAR

Optimise your drying process with the Exergy pressurised superheated steam

DISCOVER THE ADVANTAGES:

SUSTAINABLE

- Zero atmospheric emissions & odor-free
- Energy recovery as pressurised steam
- Water recovery & reduced CO2 footprint

LOW MAINTENANCE

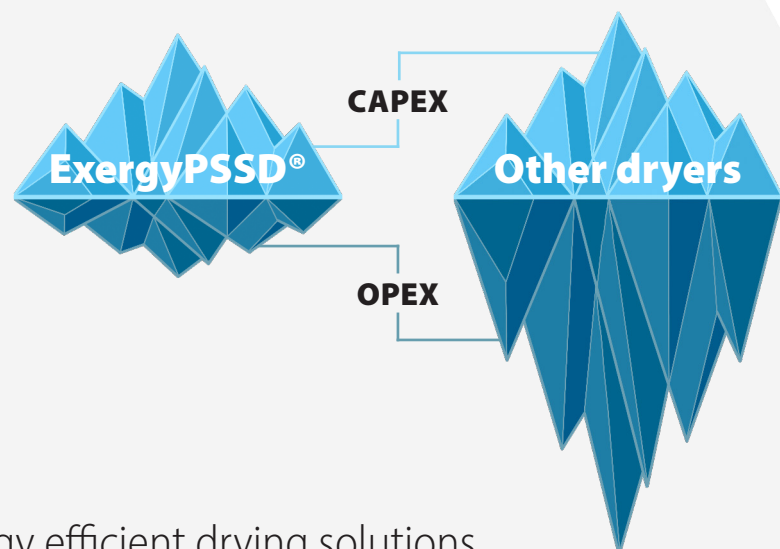

- Few rotating parts & minimal maintenance
- Engineered for 24/7 seamless operation
- No risk of fire or explosion

FLEXIBLE DESIGN

- Suited for various capacities
- Flexible design & compact footprint
- Tailored to your needs & requirements

SUPERIOR DRYING RESULTS ACROSS A WIDE RANGE OF RAW MATERIALS

Tailored to meet the high standards
of premium production.

EXPLORE THE DIFFERENCE WITH EXERGY PSSD:

- Cut transport costs and extend shelf life
- Achieve precise and uniform drying
- Eliminate oxidation or discoloration
- Increase bulk and absorption
- Ensure 100% sterilisation

TEXTILE FIBERS

RECYCLED BOARD & SLUDGE

PULP & PAPER

Drying with superheated steam can significantly reduce
your most energy-intensive process, that is a monumental
victory for the industry and a giant leap towards sustainability!
