SAFETY NOTICE

CLASS III SYMBOL

A Class III appliance is designed to be supplied from a separate/safety extra-low voltage (SELV) power source. The voltage from a SELV supply is low enough that, under normal conditions, a person can safely come into contact, without the risk of electrical shock. The extra safety features built into Class I and Class II appliances are, therefore, not required. For medical devices, compliance with Class III is not considered sufficient protection, and further, more-stringent regulations apply to such equipment.

TECHNICAL DATA	
Operating Voltage:	5-12V DC
Current:	UP TO 1.0A
Ambient Temperature:	+10 to +35 °C
Relative Humidity:	30 to 75%
Dimensions (Ø X L):	H172 x W36
Weight:	Approx. 227g (8oz)
Battery Cell:	Panasonic NCR 18500A

BARRIER PROTECTING YOUR MACHINE

We strongly suggest the use of barrier products to protect your machine. For a visual demonstration of barrier protection methods, please visit our FK Irons YouTube channel.

This device is only for use by trained tattoo artists and not for use by children or persons of reduced physical, sensory or mental capabilities.

ONE INTRO

FK ONE

Premium quality. Accessibly priced. Sophisticatedly simple.

SPECIFICATIONS

• Output Voltage: 5-12V

• Increment/decrement voltage interval: 0.5 or 0.1V*

• Maximum output current: 1A

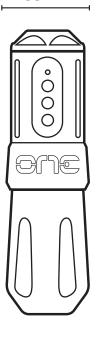

• Charger Input: USB-C

• Size: H 172mm x W 36mm

Weight: Without battery 195g (6.87oz)
 with battey 227g (8.00oz)

Battery Life: ~ 6-10 Hours
 (based on operating parameters)

36mm

172mm

OPERATION

LED indicator:

OPERATING THE ONE

REMOVING THE BATTERY

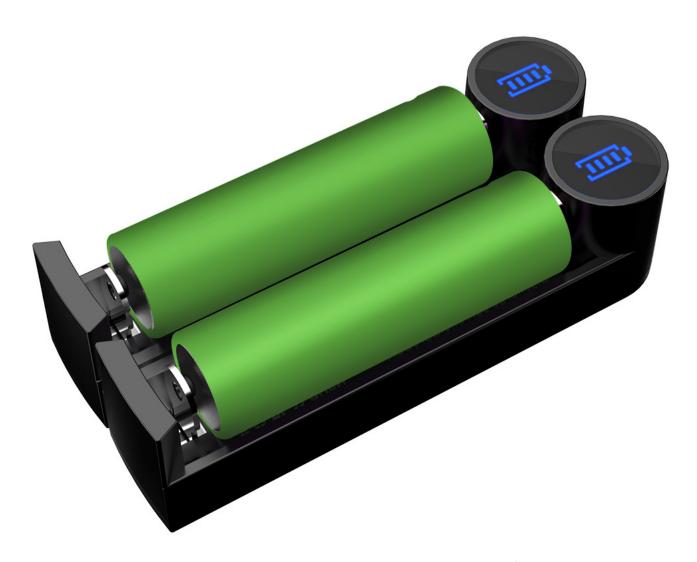

CHANGING THE BATTERY

The ONE is compatible with the Panasonic NCR 18500A Flat Top Battery. To detach the cap, ensure you have a firm grip on the body of the ONE and Grip. Turn the cap counterclockwise and pull away. Slide the battery out of the battery housing. To replace battery, slide new battery into housing. Battery must sit correctly to ensure power electric leads align correctly. Avoid contact with the ONE power leads while changing battery.

Turn power off before removing battery from machine.

CHARGING YOUR BATTERY

HOW TO CHARGE YOUR BATTERY First, plug the eFest Slim K2 charger into a wall outlet using the included power adapter. Next, insert the Panasonic 18500A battery into one of the charging bays on the eFest Slim K2 charger. Be sure to insert the battery with the positive (+) end facing up, and the negative (-) end facing down. The eFest Slim K2 charger will automatically detect the

type of battery you have inserted and display the battery life on the screen. Once the battery is fully charged, the eFest Slim K2 charger will automatically stop charging and display a message indicating that the charging process is complete. You can then remove the battery from the charger and use it as needed.

ADJUSTING NEEDLE DEPTH

Increases needle depth

Turning the grip as shown increases needle depth.

Decreases needle depth

Turning the grip as shown decreases needle depth.

ADJUSTING NEEDLE DEPTH

To adjust needle depth, hold the machine body while turning the Grip. A counter-clockwise turn decreases depth, while a clockwise turn increases depth (also known as needle hang).

Each time you turn the grip you can feel the tactile feedback of the ratcheting mechanism.

Each "click" displaces your needle 0.2 mm and allows you to set your needle precisely without involuntarily turning while tattooing.

ADDITIONAL INFORMATION

VOLTAGE PARAMETERS

While voltage is a parameter that will vary from artist to artist, the ONE has been tested to operate at a minimum voltage of 5 Volts to a maximum voltage of 12 Volts.

Depending on the type of needle configuration, or brand you use, feel free to adjust the voltage to obtain the desired performance.

WARRANTY

Darklab warrants that the device will perform efficiently when used as intended. Should this product prove to be defective due to manufacturing issues, Darklab will repair/replace the device free of charge. This warranty will be void if the device shows signs of having been tampered, disassembled, handled roughly, dropped, overexposed to moisture or damage resulting in compromised functionality.

HANDY TIPS

The following tips will help you get the most out of your ONE and avoid potential issues:

- Do not exceed the suggested voltage
- Use only FDA-approved cold sterilization solutions for disinfection
- NOT AUTOCLAVABLE
