

Acryl 1127

Version 2026-10-22b · Revision 2026-10-22

Product Description

Acrylic Emulsion 1127 is a self-cross-linking acrylic resin emulsion for flexo and gravure printing applications with excellent chemical resistance and good adhesion properties on various packaging film.

Applications

- Surface printing onto polyolefins/PET/PVC
- Suitable for heavy duty PE printing

Principal Properties

- Type - Anionic acrylic emulsion
- Neutralizing agent - Ammonia

Material Safety

A material safety data sheet of the products is available on request.

Physical Data

Form of supply	Yellowish translucent liquid
pH value	7.7-8.3
Viscosity	100-200
Non-volatile content (%)	43-47

Packaging, Shipping & Storage

Acryl 1127 is supplied as yellowish translucent liquid. The product is packed in 18 kg plastic drum or 125 kg plastic drum and shipped on pallets of 800 kg. Store indoors in the original, unopened containers in a dry place at 5–40°C; avoid direct sunlight. Shelf life: 360 days from the last quality-control date stated in the Certificate of Analysis.

All the information above is based on data obtained at laboratory and is not to be used for certifying the suitability of the product. Users are advised to test the product in their own system before purchase.
