ACRYLIC EMULSION 1127

Product Description

Acylic Emulsion 1127 is a self-cross-linking acrylic resin emulsion for flexo and gravure printing applications with excellent chemical resistance and good adhesion properties on various packaging film.

Applications

Surface printing onto polyolefins/PET/PVC
Suitable for heavy duty PE printing

Principal Properties

Type - Anionic acrylic emulsion
Neutralizing agent - Ammonia

Delivery Form

Supplied in 18 or 125kg plastic drum

Product Specifications

Property	Range	Unit
Appearance	Yellowish translucent liquid	
Solid content	43-47	%
Viscosity	100-200	cps
PH(25°C)	7.7-8.3	

Storage Guidelines

The emulsion should be stored indoors in the original, unopened and undamaged containers in a dry place at storage temperatures between 5– 40 ºC. Exposure to direct sunlight should be avoided.

Shelf Life

Under the stipulated storage conditions, the anticipated shelf-life is 360 days from last quality control date, as stated in the Certificate of Analysis.

Material Safety

A material safety data sheet of the products is available on request.

All the information above is based on data obtained at laboratory and is not to be used for certifying the suitability of the product. Users are advised to test the product in their own system before purchase.
